

PROPOSED DRAFT AMENDMENTS FOR DISCUSSION IN USSN 90/007,946

TITLE: Method and System for Placing a Purchase Order Via A Communications Network

USSN 90/007,946

Proposed draft amendments to claims 1 and 11 for discussion purposes at Examiner Interview on Nov. 15, 2007:

1. A method of placing an order for an item comprising:

under control of a client system,

displaying information identifying the item purchasable through a shopping cart model; and

in response to only a single action being performed, sending a request to order the item along with an identifier of a purchaser of the item to a server system;

under control of a single-action ordering component of the server system,

receiving the request;

retrieving additional information previously stored for the purchaser identified by the identifier in the received request; and

generating an order to purchase the requested item for the purchaser identified by the identifier in the received request using the retrieved additional information; and

fulfilling the generated order to complete purchase of the item

whereby the item is ordered without using ~~[[a]]~~ the shopping cart ordering model.
