

PROPOSED DRAFT AMENDMENTS FOR DISCUSSION IN USSN 90/007,946

11. A method for ordering an item using a client system, the method comprising:

displaying information identifying the item purchasable through a shopping cart model
and displaying an indication of a single action that is to be performed to order the
identified item; and

in response to only the indicated single action being performed, sending to a server
system a request to order the identified item

whereby the item is ordered independently of [[a]] the shopping cart model and the order
is fulfilled to complete a purchase of the item.
